

Making the case for digital faxing

eFax Corporate offers major benefits for law firms

To be successful, law firms need a reliable way to send and receive important documents quickly and securely. Digital faxing with eFax Corporate provides your firm with paper- and hardware-free faxing that boosts productivity and cuts costs.

Access faxes anywhere

When someone sends a fax to your fax number, it's delivered to you as an email attachment. It can be read, forwarded and saved for quick access from any desktop, laptop, smartphone, wireless PDA or Blackberry. Send faxes just as easily. Legal professionals will have instant access to important faxes wherever, whenever.

Boost productivity

Cut down on time wasted waiting on fax machines, handling paper, and looking for lost faxes. Electronic fax files can be easily integrated into your existing document management system, giving you online access to your important documents. Secretaries, paralegals and attorneys can share faxes instantaneously, without copying and manually distributing paper faxes.

Cut out overhead

eFax Corporate lets you retire expensive fax servers and fax machines. No more wasting IT resources, replacing old hardware or paying for fax supplies and repair bills. With faxes saved digitally, you'll avoid the storage and disposal fees associated with paper faxes. In addition, eFax Corporate allows you to automatically associate the cost of a fax to a specific client-matter ID code for easy billing.

Maintain privacy and security

Keep private faxes private with files delivered directly to your computer. You won't have to worry about prying eyes finding confidential information lying in a fax machine. eFax Corporate also helps you meet the latest HIPAA, Sarbanes-Oxley and GLB regulations.

Reliable digital faxing

eFax runs the world's largest online fax network, with over 11,000,000 clients in 35+ countries. The eFax network is protected by patented firewall, redundancy and security technologies, which ensure a 99.5% uptime, delivery times of 2-5 minutes and unparalleled transmission security.

Simple setup

eFax Corporate is easy to set up. Log in to the online account manager and assign fax numbers to your employees in minutes. No time-consuming hardware setups or calls to the phone company. Ask one of our sales representatives how eFax Corporate can work for your firm.
