

The eFax Corporate solution

eFax Corporate is a paperless, cost-effective outsource alternative to fax machines and servers that enables your business to send and receive faxes quickly, privately and securely by email. Access and file faxes anywhere on your desktop, laptop or wireless device and eliminate hardware and software costs, extra dedicated phone lines, busy signals and paper clutter and waste.

Faxing made simple

eFax Corporate is easy-to-use, scalable, reliable and quickly deployed in just a matter of minutes.

- **Instant access** – Faxes are transmitted by email for quick, reliable, private access, and managed in a digital and paperless environment.
- **Low cost, fast rollout** – eFax works in existing email networks and requires no software or hardware expenditures.
- **Easy administration** – The online admin tool lets you set up and add new users and individual fax numbers, and track and report fax activity by user.
- **Highly Compatible** – eFax supports 40+ file formats, such as JPEG, DOC and GIF.
- **Secure and scalable technology** – eFax executes 35+ million transmissions per month with disaster recovery, business continuity and 24-hour monitoring at 50+ data centers worldwide.
- **Regulatory Compliance** – eFax helps companies meet HIPAA and GLB compliance standards and has advanced safety features including TLS for encrypted email transmissions and VPN solutions for optimal security.
- **eFax Messenger included** – Our optional software lets you annotate and sign documents digitally, track costs and more. Ask for details.
